When a couple marries, they have a vision of a future together with a shared nest egg and a peaceful retirement. When they divorce, that vision is gone, along with the partnership that once brought stability. It's a transition often resisted due to fear.

"The scariest thing about divorce is the uncertainty," explains Daryl Weinman, managing partner of Weinman & Associates, P.C. "Will I have enough money to survive? Will we have to move? Will the kids change schools? How will our property and savings be divided?"

Stressful as these concerns may be, Weinman speaks from experience when she reassures clients there is life after divorce. And with the right attorney, they have the opportunity to create a new life and a new vision with more confidence and financial security than they had in their miserable marriage.

"Once a spouse has reached their breaking point and decided that they need to end their marriage, they should consult with an attorney to get an idea of what life might look like post-divorce," says Weinman. "It's always possible to move forward and create a better tomorrow."

For Weinman, helping clients move forward goes beyond finalizing a divorce and dividing assets.

"I help clients create a plan for their future by connecting them with trusted professionals

in all areas surrounding separation," she says. "I'll get them legally divorced, but I'll also connect them with a financial planner, therapist, real estate agent, and anyone else they may need based on their circumstances."

Understandable Solutions for Complex Cases

Divorce is rarely simple, but when it comes to complex cases involving phantom stocks, cryptocurrency, shared businesses, and more, the details can come across as overwhelming—especially for those still dealing with the grief caused by separation.

With a degree in economics, and years spent working for JP Morgan and with complex financial assets, it's the uniquely difficult

cases that keep Weinman passionate about her work.

"For complex cases, it's critical to find an attorney who not only understands the intricacies of Wall Street and property division, but who can also educate clients to help them understand their options," says Weinman. "Clients need to make informed decisions about their finances and future."

Educating clients is a task Weinman handles with delicacy and empathy. "I'll start by explaining their options at a high level and will continue to break it down until they have a comfortable understanding," she explains. "Conversations can be hard to process, so I follow up with emails and supporting articles they can refer back to in their own time to better understand their situation."

"I never tell clients what to do, but I'm here to guide them toward the best solutions and to help clear the uncertainty of divorce," she adds. "I want to instill hope for a life after marriage."
